Aims & Scope

From the Oxford Internet Institute and the Policy Studies Organization, *Policy & Internet* is the first major peer-reviewed journal investigating the *implications of the Internet* and associated technologies for public policy.

The Internet is now the most important international medium of communication and information exchange, embedded in interactions between citizens, firms, governments, and NGOs, and bringing with it *new practices, norms, and structures*. *Policy & Internet* will be the premier venue for scholars and researchers to set the public policy agenda in the digital era.
