## Aims & Scope

*Poverty & Public Policy* publishes the most relevant policy research on poverty, income distribution, and welfare programs, globally and across the **spectrum of disciplines**, academic perspectives, and approaches. Papers analyze what works and what does not on topics such as demographics, **economic crises**, legal and financial infrastructures, food policy, and social security, as well as theoretical questions of ethics and justice. The journal reaches out globally to integrate important studies from the **developing world** into the scholarly literature, including case studies by aid workers and officials who confront the day-to-day reality of global poverty. This journal is published in partnership with the Policy Studies Organization.

## Call for papers

The journal will be eclectic, publishing peer-reviewed empirical studies, peer-reviewed theoretical essays on approaches to poverty and social welfare, book reviews, data sets, edited blogs, and incipient data from scholars, aid workers and other hands-on officials in less developed nations and nations that are just beginning to focus on these problems in a scientific fashion.
